

FROM OBSERVATION TO PROGRESS REPORT

Two steps, or seven.

WITH PARLANCE

YOU	Observe
YOU	Enter the data
<i>The data is already data.</i>	
DONE	Progress report

WITH AN AI SCRIBE

YOU	Observe
AI	Infers the data from the session
AI	Rewrites it as a SOAP narrative
YOU	Proofread
AI	Pulls the data back out of the prose
AI	Interprets the data in aggregate
YOU	Proofread again
DONE	Progress report

WHAT HAPPENS TO YOUR SESSION DATA

AI SCRIBE

Data → Prose → Data → Report

PARLANCE

Data → Report

An AI scribe turns your observation into prose. Then the prose has to become data again for the progress report.

Every AI scribe conversion is a guess you have to check.

Parlance keeps it data the whole way.
